Shaun May, COA Environmental Health Director told me verbally that he is good with the plan; however, I think we do need consent from the father to get rid of the items.

Subject: Re: Final Monitoring and Sampling

We have been having discussions with our management on this matter all morning. We have decided to table the issue so it can be apart of the local health departments decision on habitation of the home. We should continue inside and outside monitoring thru the weekend with a final monitoring when the weather is better on Monday.

>> City of Amarillo Solid Waste is going to provide a roll-off dumpster Monday morning at (b) (6) for the mattresses and the couches. Solid waste will collect the dumpster and take it to the landfill when notified. We still need to ensure that someone contacts the Father to let him know that those items will be removed and disposed of.

>> Just want to make sure we are all on the same page regarding the final sampling.

>>

>> The plan is to do monitoring on Monday when the weather will be back up in the 60's instead of the teens to

ensure the low numbers we have been getting the last few days are consistent. This will include monitoring the residence (including the mattresses unless disposed of by then) as well as the perimeter. We need to make a final decision on the mattresses or any other material to be disposed before we can get final monitoring numbers for the house.

>>

>> Once consistency in the monitoring data is achieved, we will begin the final sampling.
